

The tables below compare health insurance premiums in 2010 and 2011 for each Medical Mutual and Anthem plan. The first two columns show the premium per pay period for faculty based on 18 paychecks per year in the current year. The next two columns show the premiums for 2011 as described in the open enrollment benefits booklet. If a faculty member is paid over 12 months rather than 9, the premium is reduced such that the annual total is equivalent. The Pct Increase columns show the percentage increase in premiums in 2011 as compared to 2010. The Annual Dollar Increase columns indicate how much more the premiums will be per year in 2011 vs. 2010.
